HOSTED EMAIL SECURITY PRODUCT SHEET

Why the GSIT Hosted Cloud?

Enterprise Email Security

Block 99.98% of all spam and rely on an industry leading false-positive ratio of less than one in 1 million. You are protected from spam, viruses, and being blacklisted.

Happy Cost Savings!

With Gardner Smith IT's email security systems in place, your employees will be more productive, safer, happier and ultimately waste less time on email threats. Because the Hosted Cloud is a gateway, you furthermore save significant infrastructure resources!

Support

GSIT is often praised for its fast, friendly, and focused support team.

Redundant = Safe

100% uptime across multiple data centres for the Hosted Cloud speaks for itself. You add additional redundancy to your network and have guaranteed email continuity.

Full Control

The GSIT Hosted Cloud comes with a multi-tier control panel. Users and admins can access quarantine, manage black- and whitelists, search logs and fully configure the spam filter according to your organisation's needs. You retain 100% of control over your email. Nothing ever gets lost!

Data Sheet
